

The Last Signal In a quiet town surrounded by misty mountains, there stood an old radio tower that hadn't sent a signal in decades. But one evening, as the sun disappeared behind the hills, the tower flickered to life. A faint transmission echoed through the valley - a voice calling for help. Eli, a young radio enthusiast, tuned in from his garage. The signal was weak but persistent. "Is anyone out there?" the voice repeated. It sounded like it came from the past. Driven by curiosity, Eli followed the coordinates hidden within the static. Deep in the forest, he found a small cabin dusty, untouched, yet the lights were on. Inside, the radio still played, repeating the same call. On the desk lay a photo of a man who looked exactly like Eli. The transmission ended. The air grew silent again. And from that night on, no one ever heard the tower's signal again.
